Sergeant, MA ARNG, about The Leader's SMARTbook - "I bought a copy of The Leader's SMARTBook while attending PLDC at Fort Dix, NJ. Boy did you hit the nail on the head with this one! Everything I needed or that was referenced as far as NCO leadership is concerned I was able to find in your book! I really think you folks need to contact the Sergeant's Major Academy at Fort Sam Houston and get them to use your SMARTBook for all their NCOES courses. Keep up the great work. You are providing a great service to our soldiers..."

This is the third revised edition of The Leader's SMARTbook. The major change from the second edition is the incorporation of the Army's most recent leadership and training doctrine to include FM 6-22 Army Leadership (supercedes FM 22-100), FM 7-0 Training for Full Spectrum Operations (Dec '08), and FM 7-1 Battle Focused Training (supercedes FM 25-101).

The sustainment warfighting function is related tasks and systems that provide support and services to ensure freedom of action, extend operational reach, and prolong endurance. The sustainment warfighting function consists of three major elements: logistics, personnel services, and health service support.

Unified land operations acknowledges that strategic success requires fully integrating U.S. military operations with the efforts of interagency and multinational partners. The sustainment of unified land operations requires a continuous link between the strategic, operational, and tactical levels. It also requires close coordination and collaboration with other Services, allies, host nation, and other governmental organizations.

Decisive action is the continuous, simultaneous combinations of offensive, defensive, and stability or defense support of civil authorities tasks. Commanders seek to seize, retain, and exploit the initiative while synchronizing their actions. Sustainment, through mission command, enables decisive action. Sustainment provides the operational commander with operational reach, freedom of action and endurance.

The Small Unit Tactics SMARTbook translates and bridges operational-level doctrine into tactical application; in the form of tactics, techniques and procedures; and provides the;how to; at the small-unit level as a ready reference at the battalion, company, platoon, squad and fire team levels.

This is the fourth revised edition of The Battle Staff SMARTbook, incorporating the full scope of new material from Change 1 (ADRP 5-0/6-0/1-02 SMARTupdate), along with complete and comprehensive;Army Doctrine 2015; reference citation, terminology and material changes from ATTP 5-0.1, ADRP 2-0 and 3-09!

Rapid planning requires extensive training in the techniques and procedures associated with R2P2. It requires standardized, detailed, parallel, and concurrent command and staff actions using Standard Operating Procedures (SOPs) that are understood by all members of the unit. The Marine Expeditionary Unit (MEU) SMARTbook helps to generate tempo and staff synergy in time-compressed situations through the use of;playbooks; for rapid planning and templates for efficient briefings.
