

Principles of Physical and Organic Chemistry, Alan Jarvis, Thomas Nelson & Sons, Limited, 1997, 0174482574, 9780174482574, . Nelson's Advanced Modular Science series is based on the London Examinations A and AS level modular science syllabuses. Each book offers complete and self-contained coverage of the topics required for study in the relevant module..

Molecular Thermodynamics , Donald Donald Allan McQuarrie, John John Douglas Simon, Jan 1, 1999, Science, 656 pages. Evolved from McQuarrie and Simon's best-selling Physical Chemistry: A Molecular Approach, this text follows a similar path by first covering the principles of quantum mechanics

Science Key stage 2 practice, Alan Jarvis, Joan O'Sullivan, William Merrick, May 31, 2002, , 96 pages. .

Physical chemistry , Farrington Daniels, Robert A. Alberty, 1955, , 671 pages. .

Periodicity, Quantitative Equilibria & Functional Group Chemistry , Rod Beavon, Alan Jarvis, Oct 17, 2003, Science, 160 pages. Nelson Advanced Science: Chemistry is a series of four high quality student books for senior chemistry..

Physical and Inorganic Chemistry Applications, Alan Jarvis, Rod Beavon, Aug 30, 1998, Chemistry, Inorganic, 89 pages. .

New Understanding Biology for Advanced Level , Glenn Toole, Susan Toole, 1999, Juvenile Nonfiction, 698 pages. A complete full-colour version of the best selling Understanding Biology for Advanced Level student book. This revised edition includes popular topics such as Biotechnology and

Physical Chemistry A Molecular Approach, Donald Donald Allan McQuarrie, John John Douglas Simon, Jan 1, 1997, Science, 1270 pages. Unlike most physical chemistry texts, modern physical chemistry research is based on quantum mechanics, and this state-of-the-art approach is the one adopted by McQuarrie and

World of Chemistry , Steven S. Zumdahl, May 1, 2002, , 755 pages. .

Structure Bonding And The Periodic Table , Rod Beavon, 1996, Molecular structure, 89 pages. This modular chemistry text begins with a brief history then moves on to cover atomic structure, quantitative chemistry, bonding, oxidation/reduction and the transition metals

The physics and chemistry of materials , Joel Irwin Gersten, Frederick William Smith, Jun 25, 2001, , 826 pages. A comprehensive introduction to the structure, properties, and applications of materials This title provides the first unified treatment for the broad subject of materials

Chemical Ideas, Volume 4 , , 2000, Chemistry, 392 pages. Chemical Ideas is used alongside Chemical Storylines to provide the factual background. It explains major chemical concepts, and includes a wide range of problems for students

Transition Metals, Quantitative Kinetics and Applied Organic Chemistry , Brian Chapman, 2004, Science, 160 pages. The revised edition of the highly successful Nelson Advanced Science series for A Level Chemistry ð²Ð,â€œ Transition Metals, Quantitative Kinetics and Applied Organic Chemistry

Basic physical chemistry calculations , Harold Eric Avery, Duncan J. Shaw, 1980, Science, 173 pages. .

Quantum Chemistry , Donald Allan McQuarrie, 2008, Science, 690 pages. One of the best-selling Quantum Chemistry textbooks in the US..
