Games, Ideas and Activities for Primary PE engages with all six key areas of the National Curriculum and offers over 100 simple and adaptable games and activities that P.E teachers will find invaluable. Step-by-step instructions are provided for each activity, including variations for different age groups and abilities, making physical education fun and engaging for primary children of all ages. No specialist knowledge of PE is necessary and many ideas can be used either as five minute lesson starters or as the basis for an entire lesson.

As with the Classroom Gems Mathematics book, it has clearly laid-out activities where hints and tips have been given in concise chunks. As an NQT without a great deal of PE experience, I have found this series invaluable to dip into, and have shared them experienced teachers who have also found new and interesting teaching ideas within. A great present for those entering the primary classroom - particularly if, like me, you need some guidance with the rules and ideas behind the equipment!

Good layout and probably great for key stage 2+ but I bought it for foundation stage and only managed to use 2 ideas from the book. There is a lot on team sport i.e football in it, I don't consider myself to be a PE 'phobic' and guess that this book would be suitable for someone who didn't really like PE but for older children.

I've two of these Classroom Gems books now. What I find really useful about them is that the ideas are practical and adaptable. Where appropriate they highlight the Cross-Curriculum links and they effectively give suggestions for an entire lesson plan, so when stuck and need quick ideas, most of the hard work has been taken care of for you. This book follows suit and gives loads of ideas that could easily be applied when playing popular sports and games for most circumstances, rather than just having a 'kick around' for the lack of nothing else to do.

A collection of 150 unique games and activities to help support teaching of maths in the primary classroom. Designed with busy teachers in mind, the Classroom Gems series draws together an extensive selection of practical, tried-and-tested, off-the-shelf ideas, games and activities guaranteed to transform any lesson or classroom in an instant. Easily navigable, allowing you to choose the right activity quickly and easily, these invaluable resources are guaranteed to save you time and are a must-have tool to plan, prepare and deliver first-rate lessons.
