Survey of Accounting, 3rd edition, is designed to cover both financial and managerial accounting in a single 16-week course, presenting the material in a style easy for non-accounting majors to grasp. It incorporates the same pedagogical innovations that have made Edmonds' financial and managerial titles such fast-growing successes in the marketplace, including his unique Horizontal Financial Statements Model and a multiple accounting cycle approach that demonstrates the impact of related events over a series of accounting cycles.

Thomas P. Edmonds, Ph.D.: Dr. Edmonds is Professor of Accountancy at the University of Alabama at Birmingham, (UAB). He has been actively involved in teaching accounting principles throughout his academic career. He has received several prestigious teaching awards, including the UAB President's Excellence in Teaching Award and the distinguished Ellen Gregg Ingalls Award for excellence in classroom teaching. His academic experience includes being published in the Journal of Accounting Education, the Accounting Review, and the Journal of Accounting, Auditing and Finance among others. Dr. Edmonds received his Ph.D. in Accounting from Georgia State University.

Frances M. McNair, Ph.D., CPA: Dr. McNair holds the KPMG Peat Marwick Professorship of Accounting at Mississippi State University, (MSU) and received her Ph.D. in Accounting from the University of Mississippi. Her research has been published in the Journal of Accountancy, Management Accounting, and the Business and Professional Ethics Journal.

I bought this school for a graduate level class on accounting. I took several accounting classes as part of my undergraduate studies and this book blows the other accounting books I've used away. This book is written in a very easy to read and understand way. It provides clear and straightforward examples for nearly every concept. Also, although I started reading this book thinking it would just be a good review, I have found that I am still learning a lot from it. I would highly recommend this book to anyone interested in accounting!

I highly recommend this book for people who are intersted to learn about accounting but do not have much of a math or accounting background. This book clearly helps you build fundamental knowledge of accounting and takes you to a level where you could read annual income / financial statement of companies and understand it. Gone are the days when those income statements were Greek & Latin.
