A catechism of the physiology and philosophy of body, sense, and mind , Thomas Wharton Jones, 1858, Medical, 124 pages. .

This book should become a part of everyone's library because of its practical wisdom and inspiration concerning the nature of life. One can consider it a book on the philosophy of life that is applicable to all you human beings regardless of race, gender, religious preference, geographic location, socio-economic status, profession, level of education, or age. If a person can read, he or she should start with this book. It is better than just about every self-help book on the market or any college course that introduces the discipline of philosophy or the science of business.

More specifically, Alfred Montapert discusses 47 fundamental laws of life that every human being should master in order to maximize his or her full potential. Some of the laws that are discussed are the following: attitude, habit, motivation, success, creativity, self-decipline, prayer and meditation, freedom, responsibility, love, and heredity and environment. I have had this book in my possession for twelve years and have read it many times from beginning to end; I always come away with a different understanding about my life every time I read this book because there is so much insight into one's every day experiences. This is a book that you will never get tired of reading because its principles correspond with reality. If you apply these principles that Montapert explains, it is a guarantee that you will be successful at whatever you attempt to accomplish. Montapert is a very wise person, and he has put his understanding of life in this book as a gift to all who are willing to read it.

This book is the ultimate sanctuary of practical knowledge.As a matter of fact I have made it a must reading for all of my children. I think as a gift there no better gift than the gift of knowledge that promotes practical use in the here now moment. this book fills in the knowledge that one may not got in coming into adulthood.

Incidently, I first purchased this book in 1977 for \$2.95 just after graduating from college. I had put it away and reread this wonderful book and over the years a it has more meaning now than ever. So, much so that I found it imparative to make sure my young adult children have a copy as a birthday gift. There is no greater gift than the gift of Supreme knowledge that will propel one into an ability to successfully surf lifes ups and downs.

As you open this book, you will begin an exciting and inspirational adventure into new realms of self-knowledge and self-fulfillment, exploring the basic laws of man's nature and his world, the 47 LAWS OF LIFE. Here you will find the answers to the most important questions in life, the vital questions you have asked yourself. Am I getting the most out of life? What can I contribute? What changes will make my life worthwhile? What are the true values of life? How can I increase the quality and enjoyment of my life? The 47 LAWS OF LIFE are the essential, unchanging properties of

every man, woven into the web of our being, into our tissues, our nerve cells, our very bloodstream. Invisible and too often unacknowledged, they are as real as electricity, as explosive a force as the atom bomb. These laws are tools for living whose amazing power is understood and used by very few. A mastery of them can change your life. As you learn to apply them, your world will begin to expand. Things will start to happen in your life. Problems and struggles that seemed insurmountable will melt away. You will discover how to harness nature's own forces and put them to work to achieve your every goal. Unique in concept and in its direct application to the practical business of living, THE SUPREME PHILOSOPHY OF MAN points a clear path toward building a personal philosophy that will enable you to become a happier, more effective and courageous person - the exceptional human being who has learned to call upon all his personal resources and to live victoriously. As they cast new light into every corner of man's quest for the good life, these pages reveal a mother lode of wise observation and practical experience, a treasure enriched by a set of personal values expressed by some of the greatest men in history - PLUS 1001 POINTS ON THE BUSINESS OF LIVING.
